

Flow Aplikasi Chatbot

Dokumen ini merangkum alur aplikasi dari splash screen, daftar sesi, halaman chat, pemrosesan AI, penyimpanan database, sampai response tampil kembali di UI.

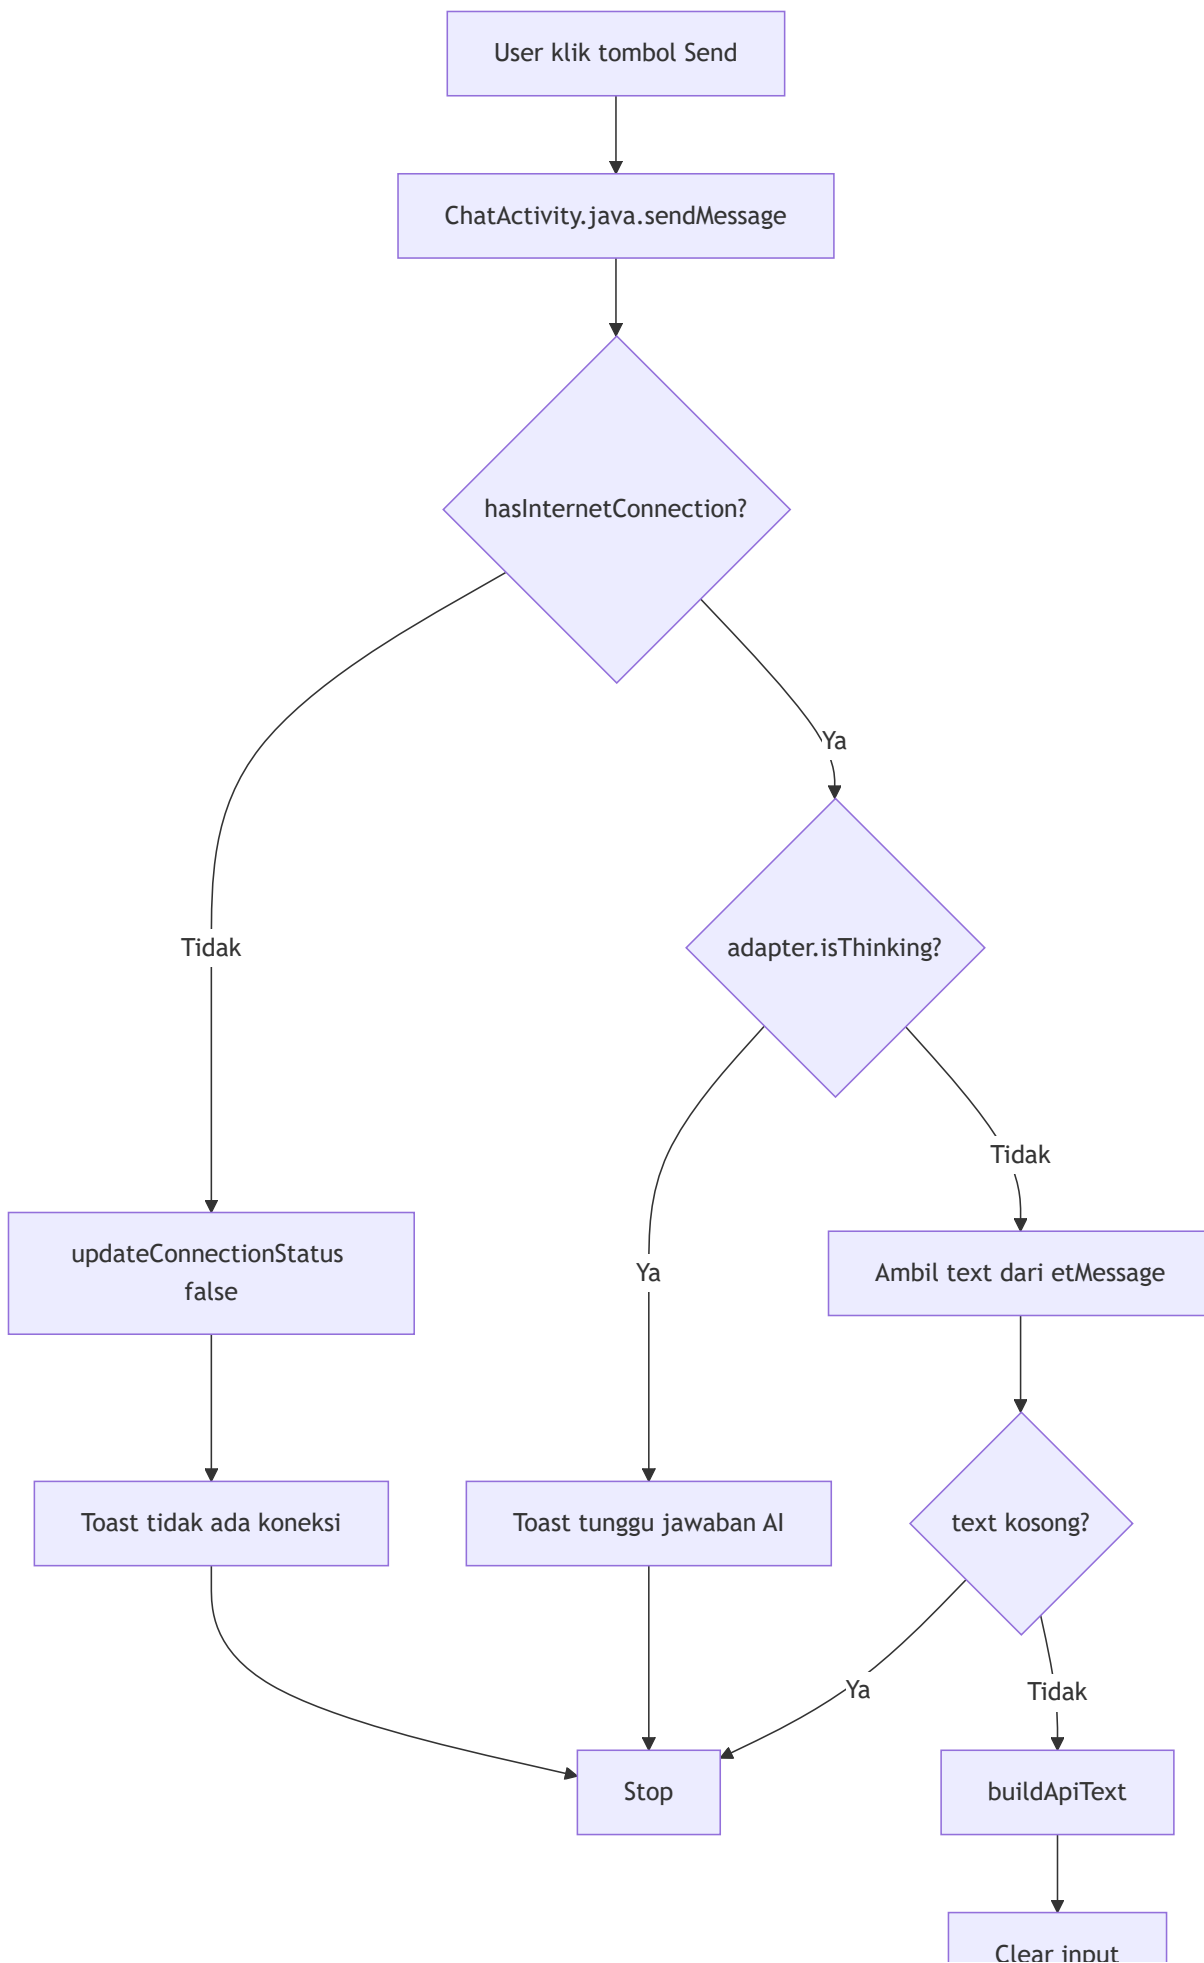

Flowchart Utama

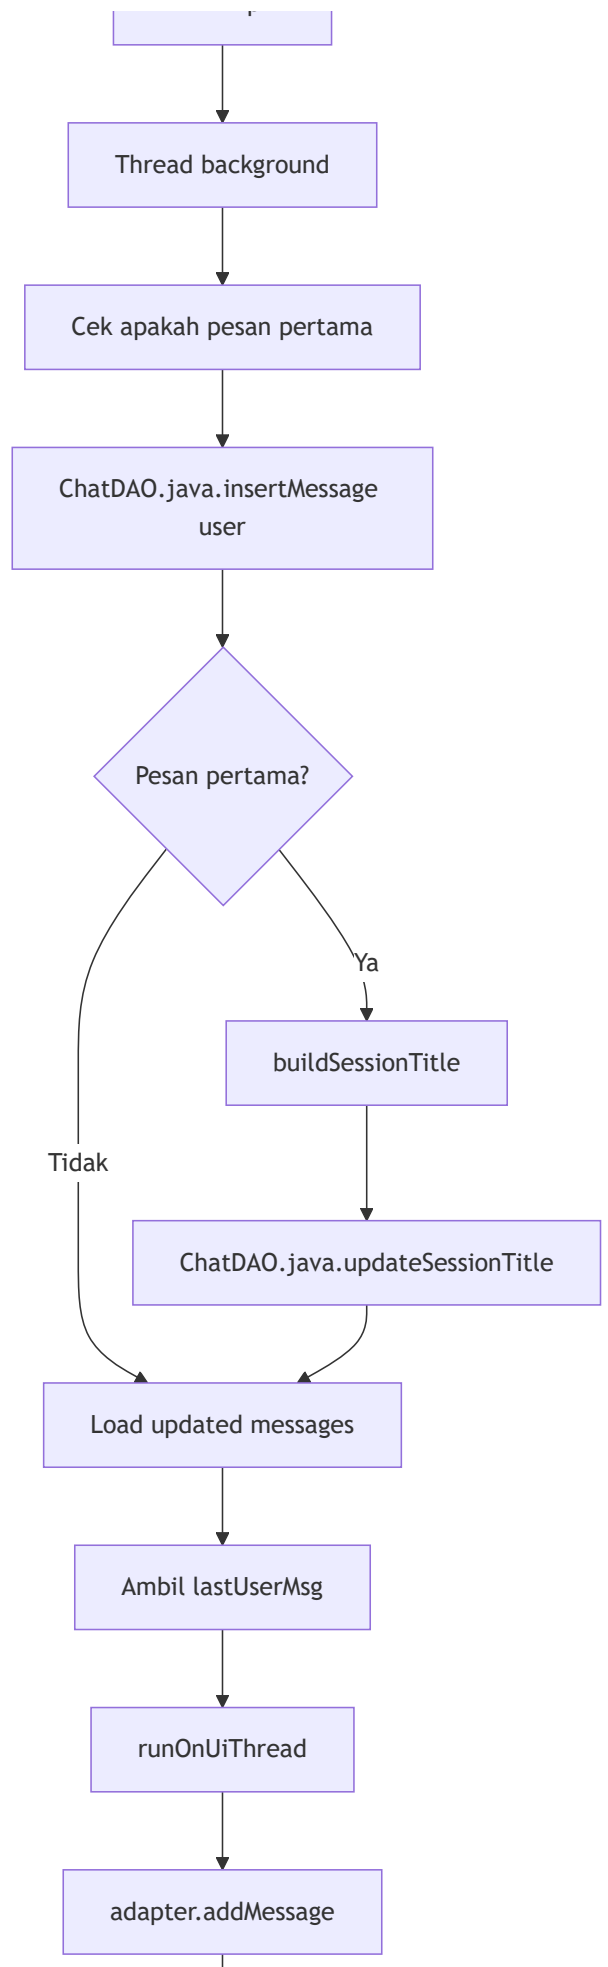

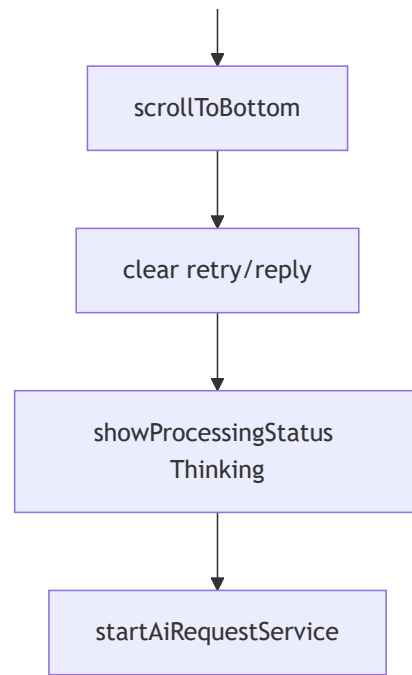

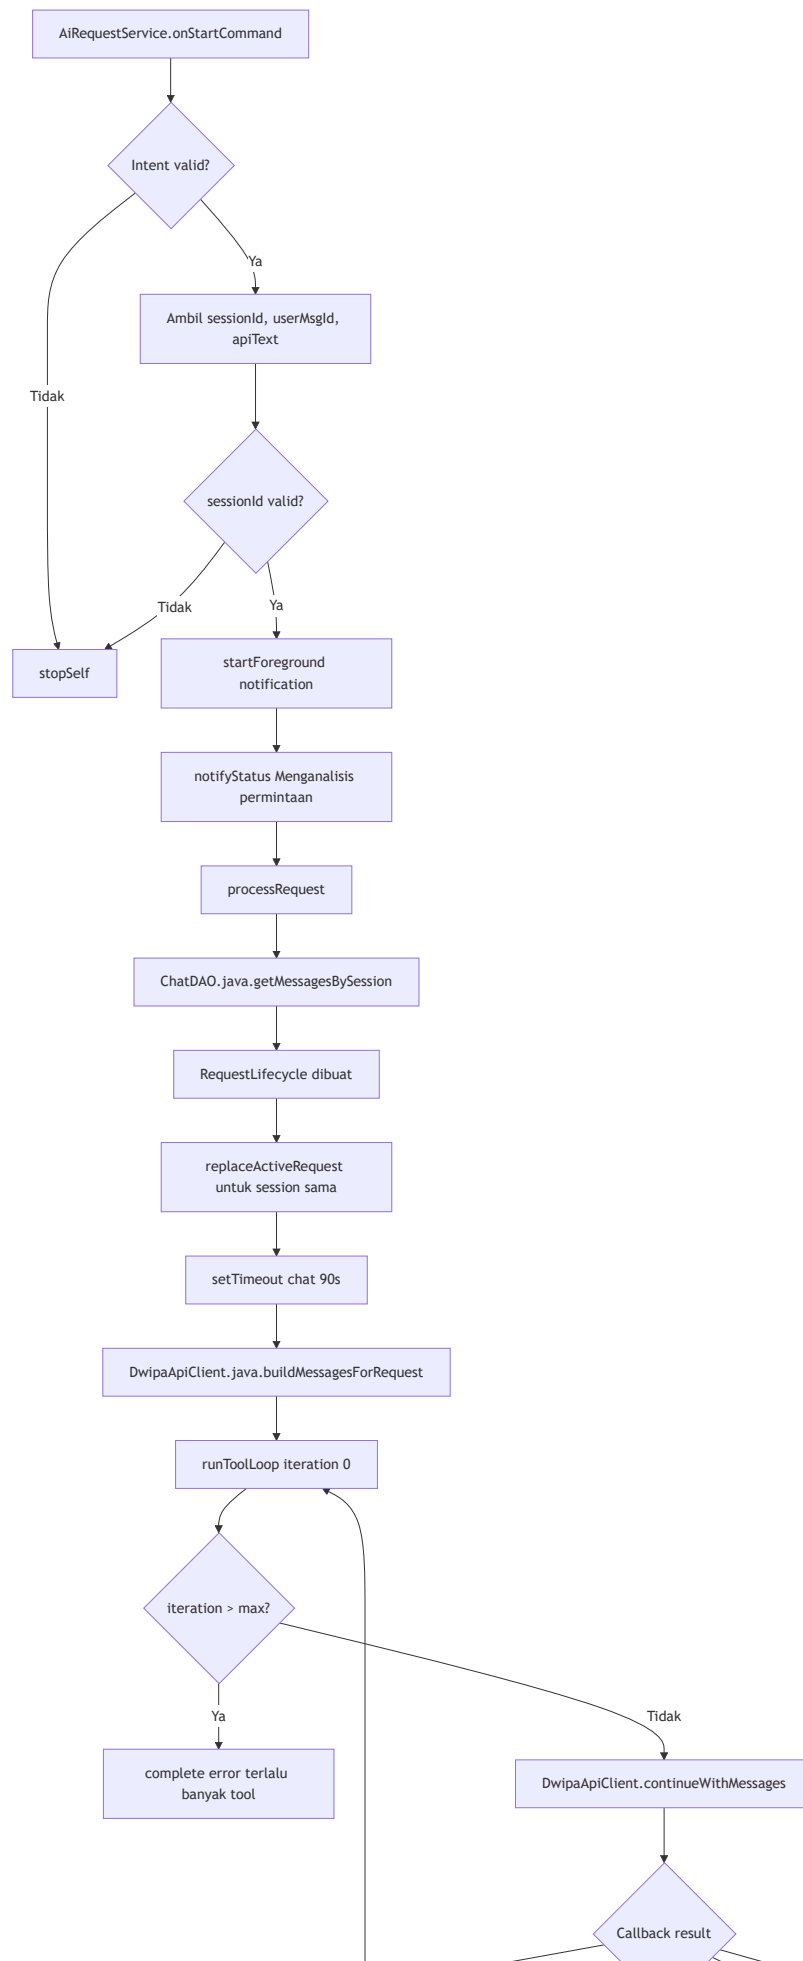

Flowchart Pengiriman Pesan

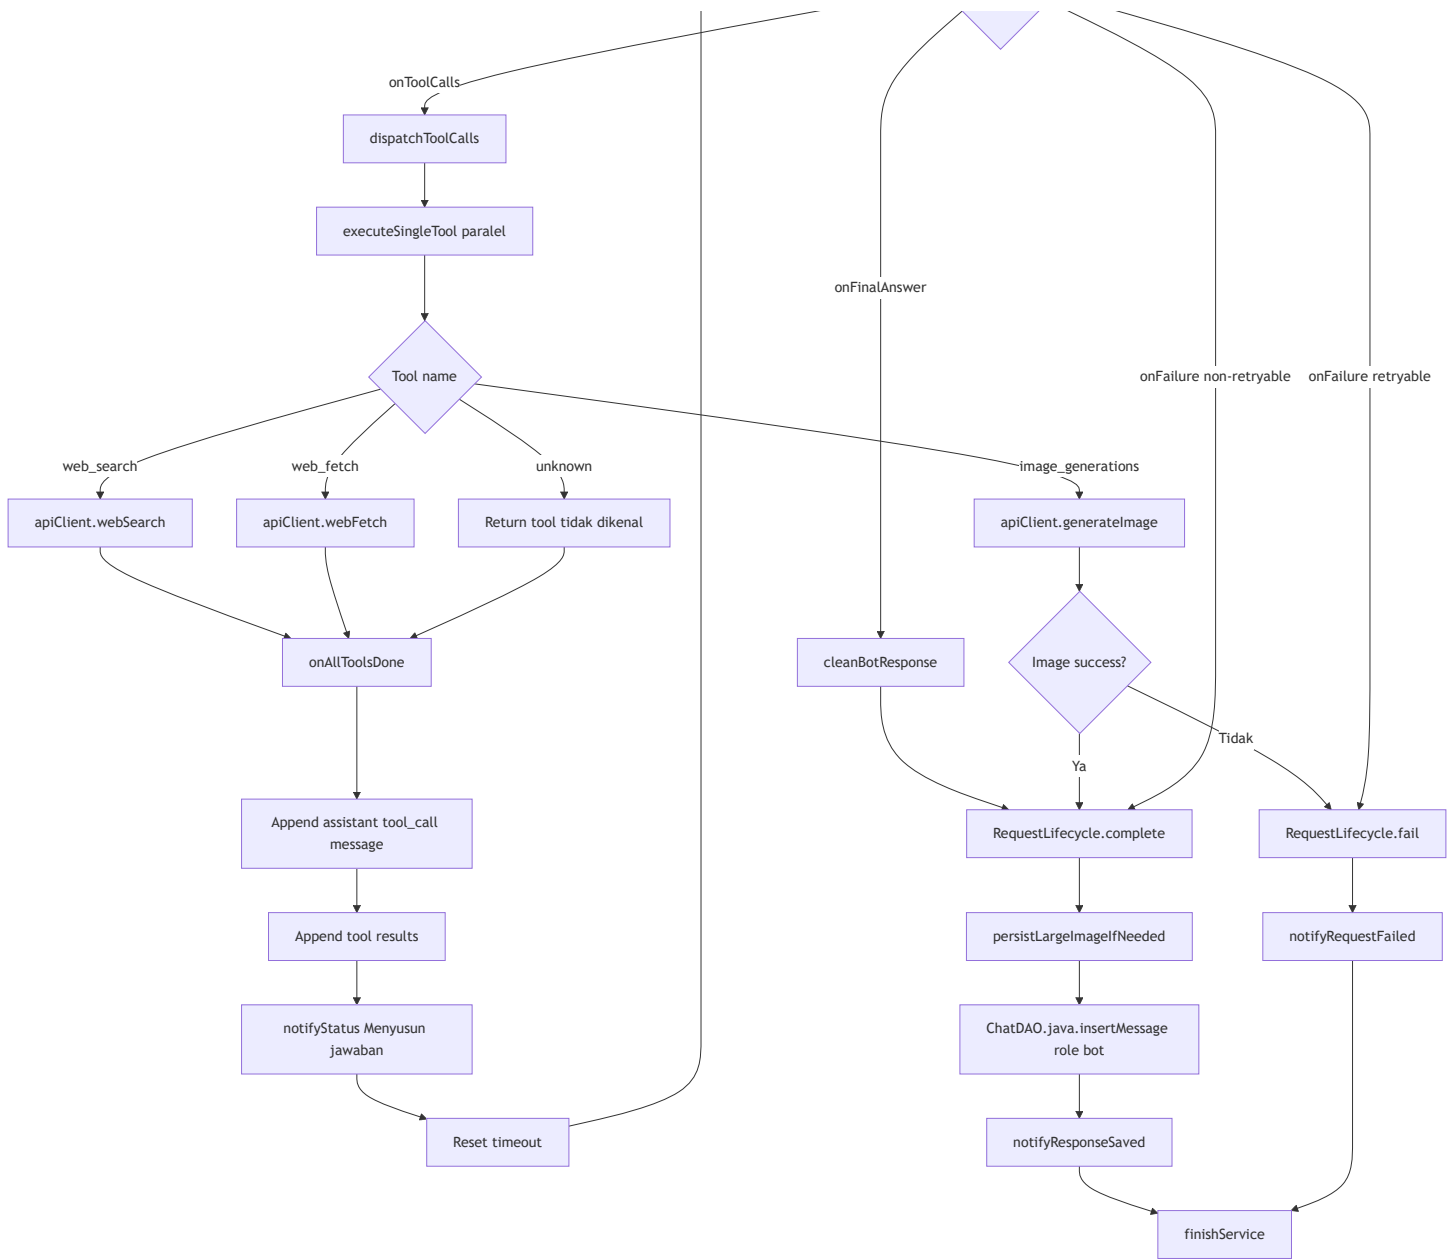

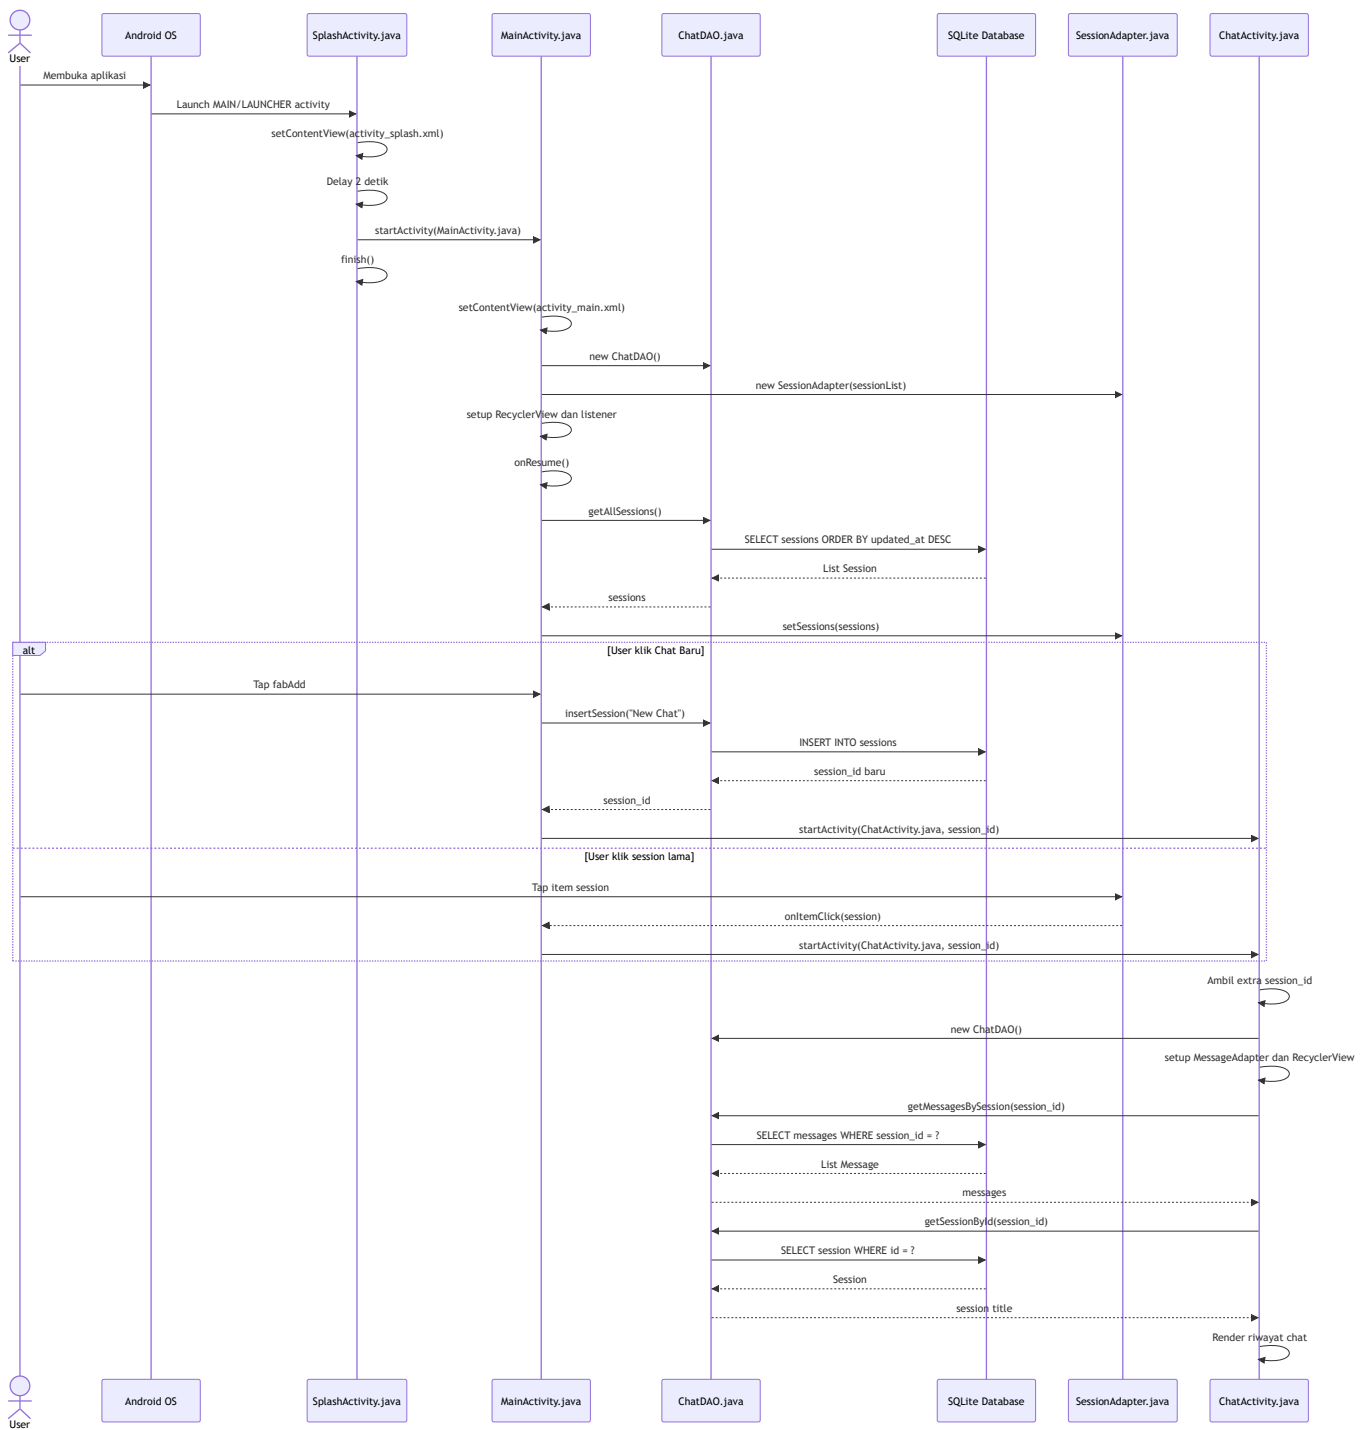

Flowchart AI Service dan Tool Calling

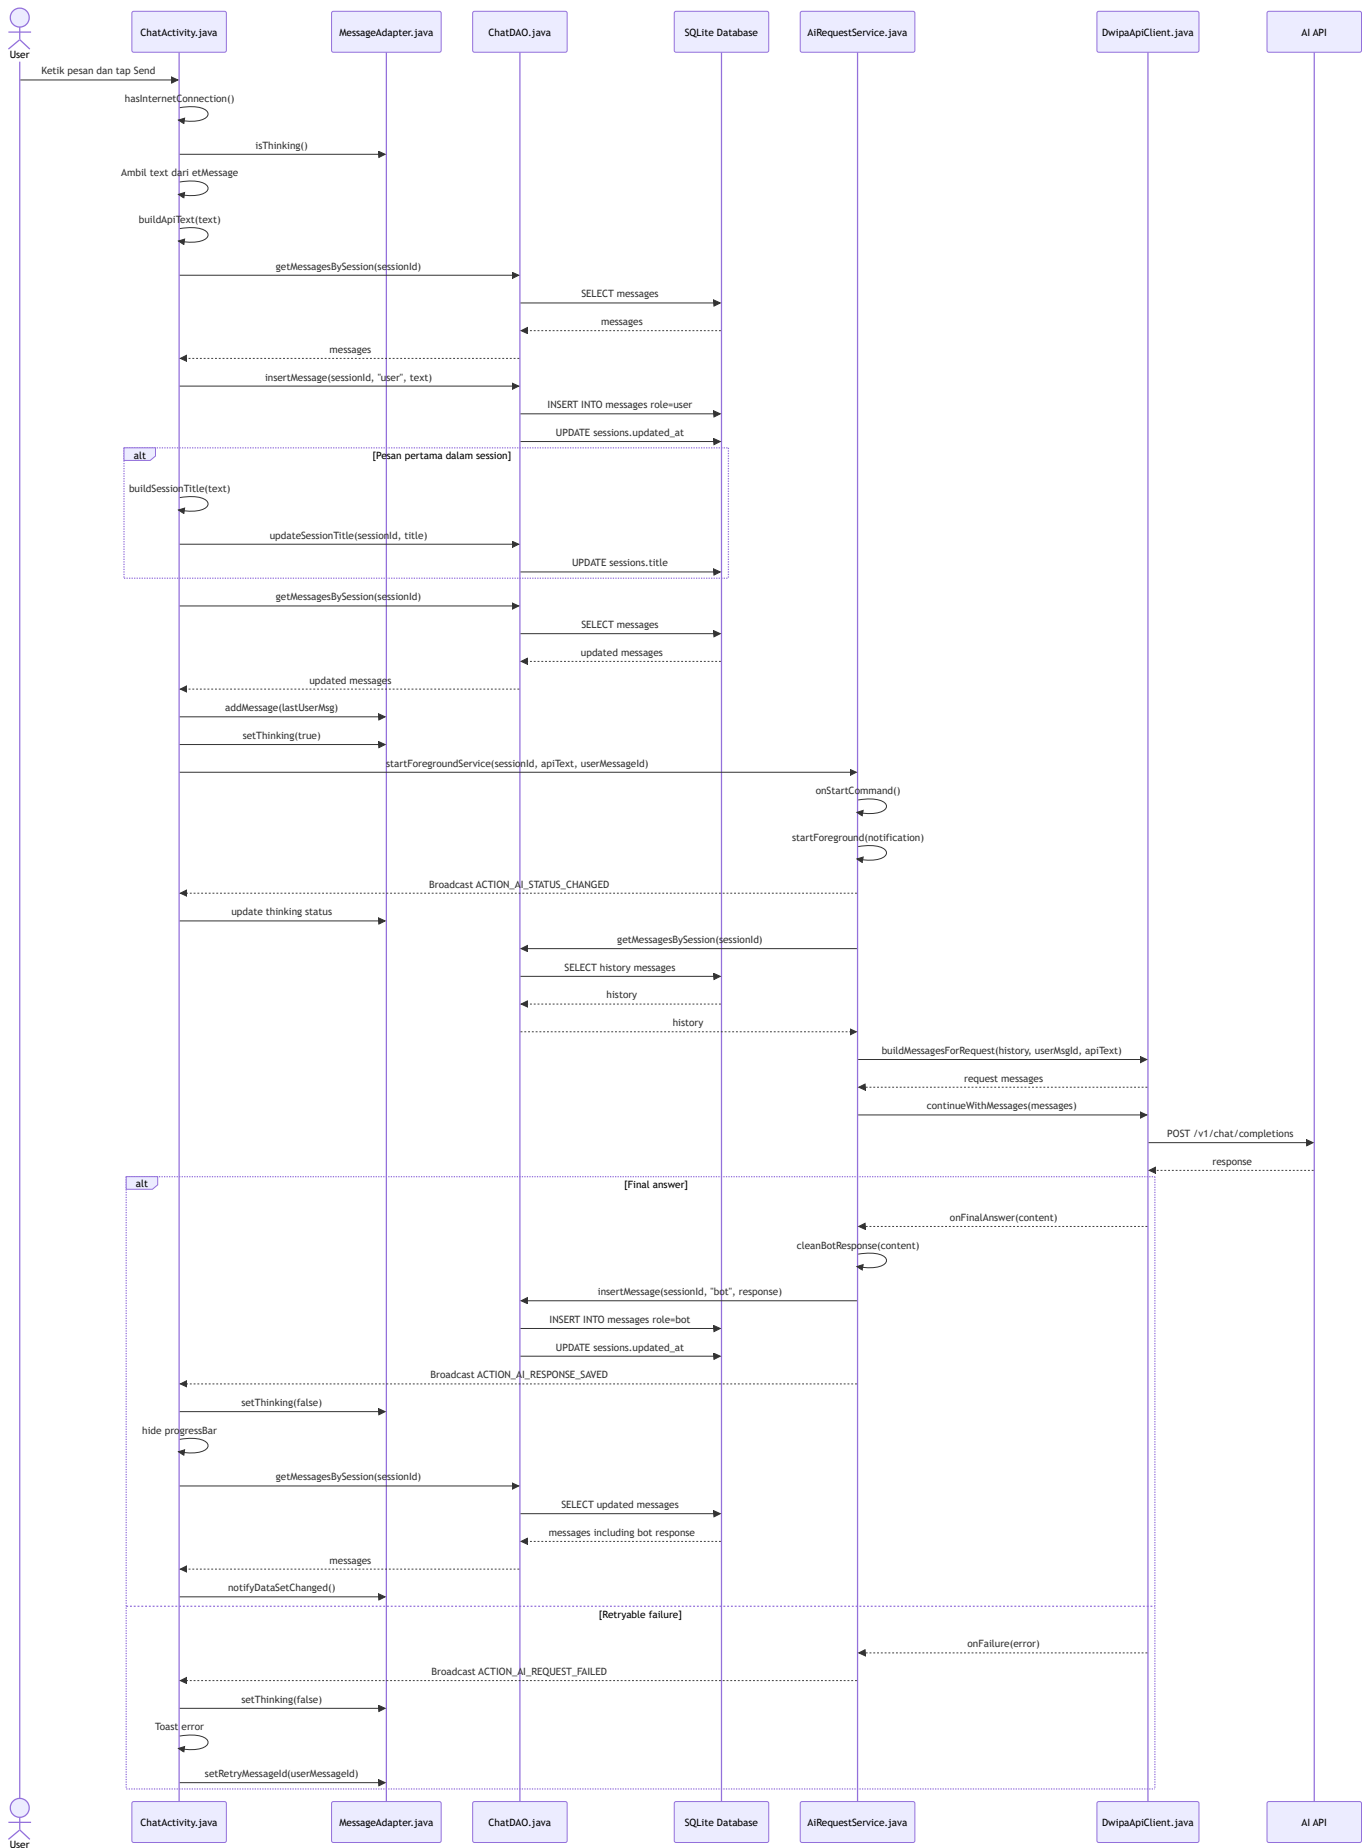

Sequence Diagram: App Launch sampai Chat Screen

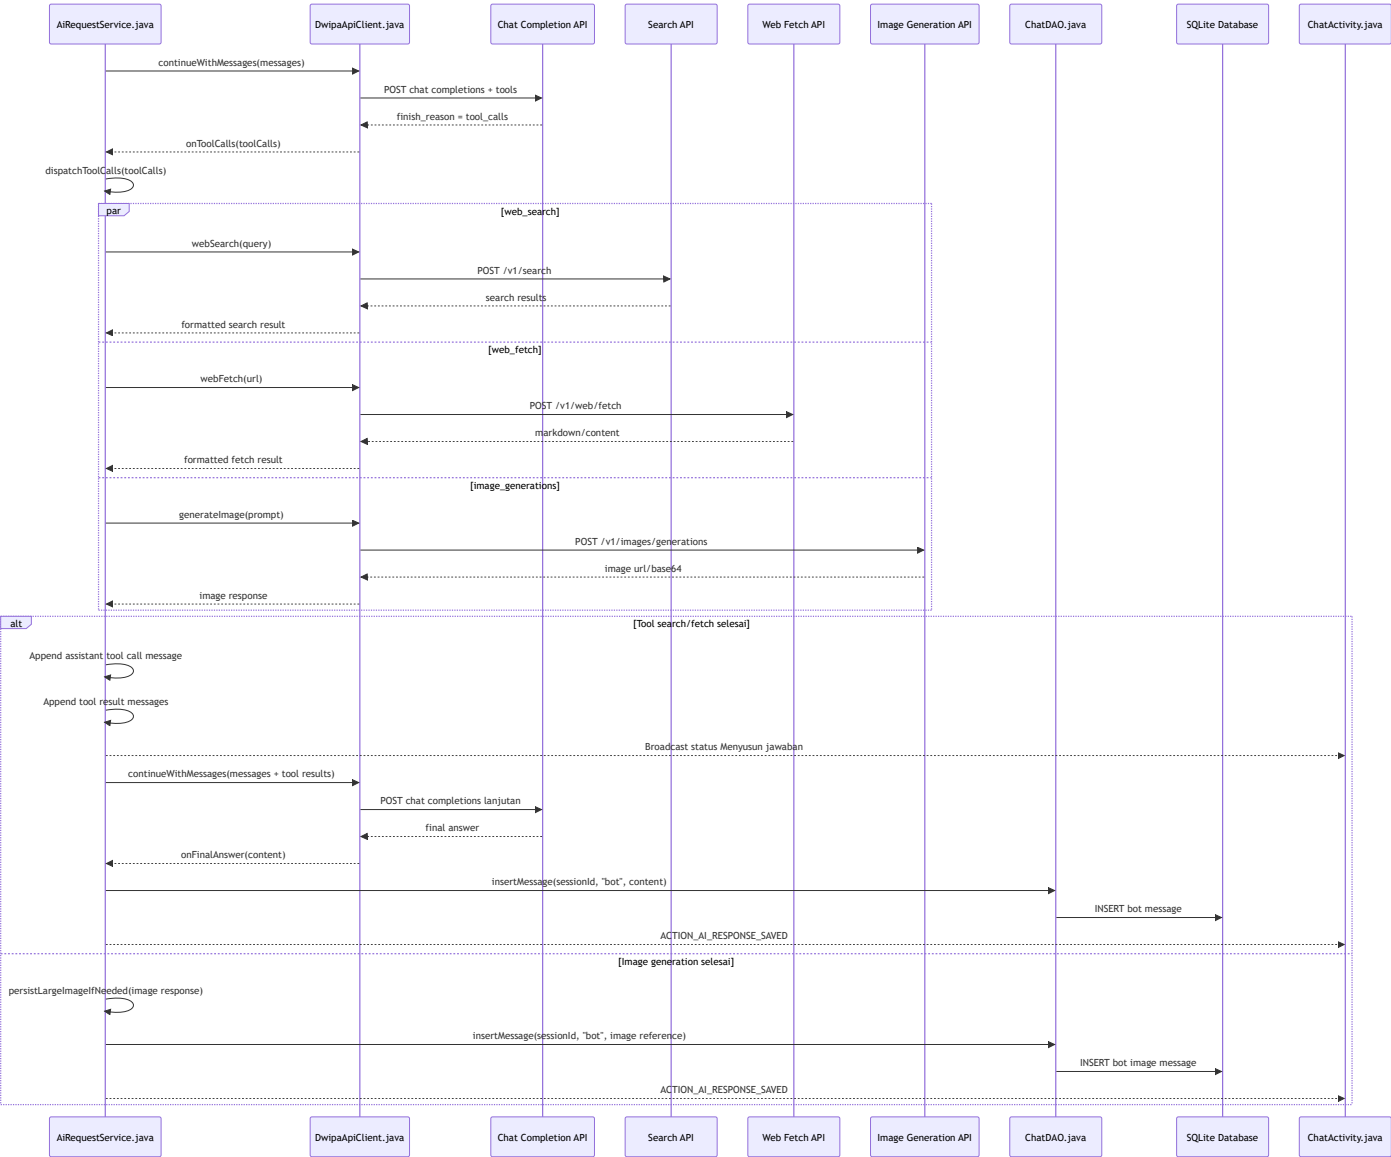

Sequence Diagram: Kirim Pesan dan Terima Jawaban

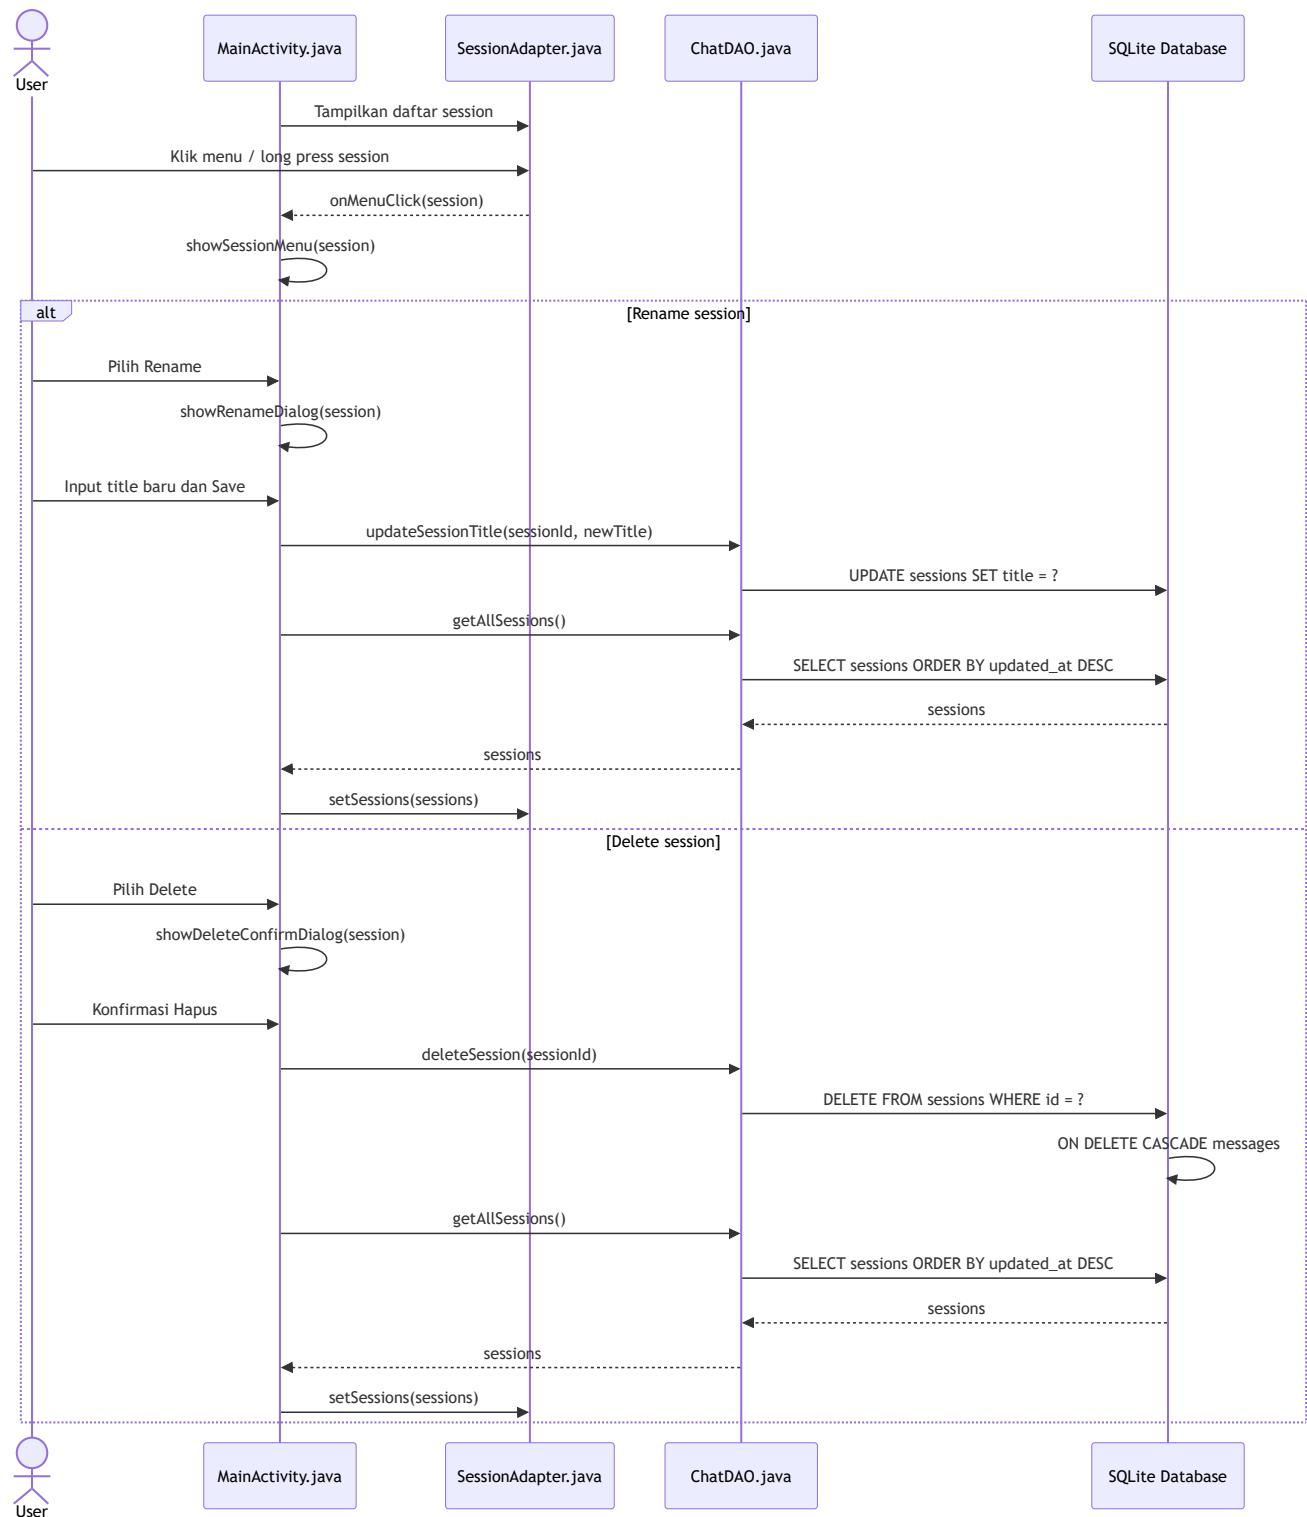

AI

Sequence Diagram: Tool Calling

Sequence Diagram: Rename dan Delete Session

Ringkasan Fungsi per File dan Ekstensi

File	Ekstensi	Jenis	Fungsi utama
AndroidManifest.xml	.xml	Manifest Android	Menentukan permission, launcher activity, service, dan activity app
activity_splash.xml	.xml	Layout XML	Tampilan splash screen
activity_main.xml	.xml	Layout XML	Tampilan halaman daftar session
activity_chat.xml	.xml	Layout XML	Tampilan halaman percakapan chat
item_session.xml	.xml	Layout XML	Tampilan satu item session di RecyclerView
item_message_user.xml	.xml	Layout XML	Tampilan bubble pesan user
item_message_bot.xml	.xml	Layout XML	Tampilan bubble pesan bot
item_message_thinking.xml	.xml	Layout XML	Tampilan indikator AI sedang berpikir
bottom_sheet_session_actions.xml	.xml	Layout XML	Tampilan menu rename/delete session
dialog_rename_session.xml	.xml	Layout XML	Tampilan dialog rename session
SplashActivity.java	.java	Activity Java	Menampilkan splash screen lalu membuka MainActivity

File	Ekstensi	Jenis	Fungsi utama
MainActivity.java	.java	Activity Java	Menampilkan daftar session, membuat session baru, rename, delete
ChatActivity.java	.java	Activity Java	Menampilkan chat, mengirim pesan, menerima broadcast dari service
SessionAdapter.java	.java	RecyclerView Adapter Java	Render item session dan callback klik/menu session
MessageAdapter.java	.java	RecyclerView Adapter Java	Render pesan user, bot, thinking, image, code block, retry/reply
AIRequestService.java	.java	Foreground Service Java	Service untuk request AI, tool calling, dan simpan response
DwipaApiClient.java	.java	API Client Java	HTTP client untuk chat API, search, fetch, dan image generation
ChatDAO.java	.java	Data Access Object Java	Operasi database untuk sessions dan messages
DatabaseHelper.java	.java	SQLiteOpenHelper Java	Membuat dan mengatur schema SQLite
Session.java	.java	Model Java	Model data session
Message.java	.java	Model Java	Model data message
build.gradle.kts	.kts	Gradle Kotlin Script	Konfigurasi build module/root project

File	Ekstensi	Jenis	Fungsi utama
settings.gradle.kts	.kts	Gradle Kotlin Script	Konfigurasi nama project, repository, dan module :app
libs.versions.toml	.toml	Version Catalog	Daftar versi dependency dan plugin Gradle

Keterangan Ekstensi File

Ekstensi	Digunakan untuk
.java	Source code Java: Activity, Service, Adapter, DAO, model, dan API client
.xml	Android Manifest, layout UI, drawable, theme, colors, strings, dan resource Android lainnya
.kts	Gradle Kotlin Script untuk konfigurasi build
.toml	Version catalog Gradle untuk dependency dan plugin
.md	Dokumentasi Markdown seperti file flow ini

Ringkasan Alur Akhir

```

AndroidManifest.xml
→ SplashActivity.java + activity_splash.xml
→ MainActivity.java + activity_main.xml
→ SessionAdapter.java / ChatDAO.java / SQLite Database
→ ChatActivity.java + activity_chat.xml
→ MessageAdapter.java / ChatDAO.java / SQLite Database
→ AiRequestService.java
→ DwipaApiClient.java
→ API chat / tools / image
→ AiRequestService.java simpan response
→ Broadcast ke ChatActivity.java
→ ChatActivity.java reload history
→ MessageAdapter.java tampilkan jawaban

```
